Broad spectrum of food application & development capabilities – all at your fingertips

32 Innovation & Application Centers worldwide

EMEA

- Two largest in Padua, Italy, and Zgierz, Poland
- New facilities in Johannesburg, South Africa and Nantes, France
- Expanded Application Center in Istanbul, Turkey

Asia

- Two largest in Vietnam and Thailand
- Strong dairy focus with two UHT pilots
- Two new in China through Zhongbai where we jointly invested with supplier Arla

Americas

Main sites in Allentown and Colombia

Our Innovation & Application Center support:

Ingredient & Flavour Selection

- Ingredient combinations and interactions
- Innovative flavour profiles
- Considering processing requirements

Formulation Guidance

- Texture & nutrient benefit
- Flexibility with alternative ingredients
- Optimise recipe for cost
- Follow market trends

Market Trend Concepts

- Application toolboxes
- Customer specific project work
- Final application design

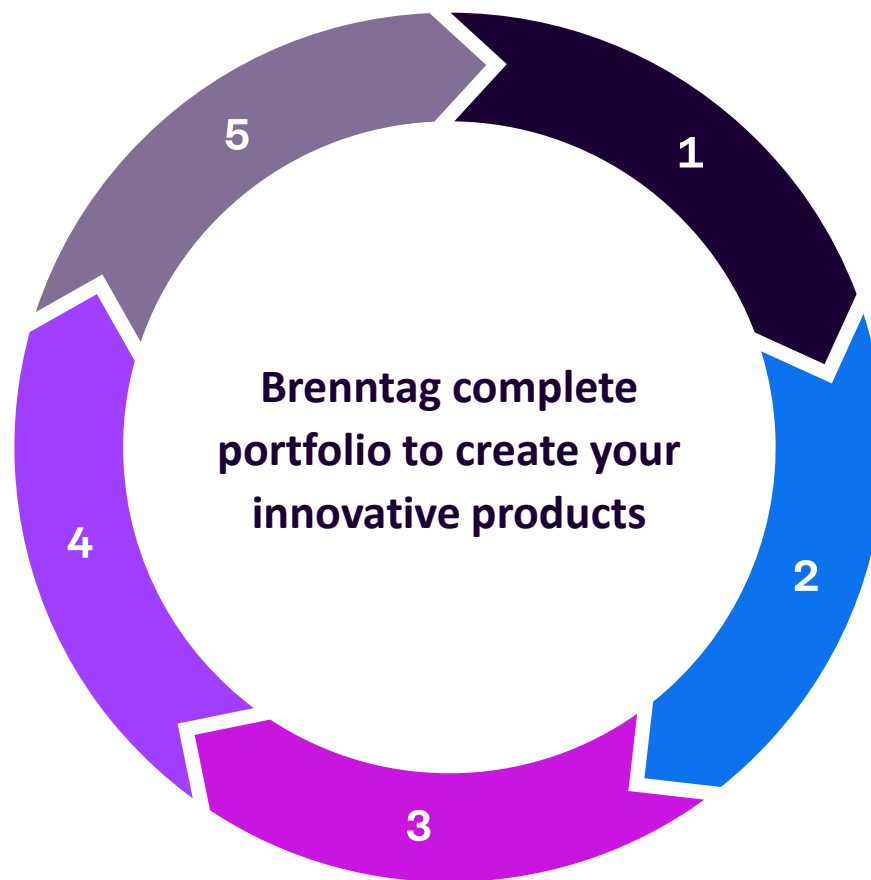

Knowledge Transfer

- Customer innovation days
- Technical trainings
- Application bulletins

Ingredients spotlight

How to create an optimal recipe?

Draft

5

Aminoacids

- Creatine monohydrates 200 mesh
- Carnitine
- AAKG
- Beta alanine
- L-arginine base and HCl
- L-citruline base and malic 2:1
- L-glutamine
- Taurine

4

Vitamins& minerals

- Functional vitamin& minerals blends dedicated to final application and customise
- Mineral sources

1

Sweeteners

- HIS- sucralose, aspartam, acesulfam K, stevia
- Polyols

2

Botanical Extracts

- Guarana ,Acerola, Panax Ginseng, Cranberry, and much more

3

Flavours

- Natura flavours
- Flavours
- Functional flavours:
 - Modifiers
 - Boosters
 - Maskers

Handling

- No weighing & production errors with individual components
- Chemical & microbiology analysis

Regulatory

- Labelling, possible nutritional claims and regulatory advices
- Certified production facilities

Market knowledge

- Following and advising on market trends
- Consumer insights → supporting trends & end-consumer expectations

Labelling

- Support on “consumer friendly” solutions → visible on the final product label declaration

Expertise

- Specialized food technologists related on the application
- Innovative ingredients
- Whole concept development related to the latest market trends

Support

- Seminars, workshops, demos
- Advice on new processes
- Easy to industrialize & to scale up

De-complexing

- Reduction of single stock ingredients
- Simplification of traceability (documentation)
- Supplier network optimization/reduction

Operation

- Supports lean production flow → reduction on “left over” materials
- Production cost optimization by time saving (preparation, weighing, ...)

Wildly Inventive

Pursuing the “wow” effect

Consumers crave the extraordinary, prompting companies to delight them with surprising mash-ups that deliver the “wow” effect.

43% of consumers globally say:
“I am looking for crazy creations that provide me with the ultimate indulgent experience.”

Top taste and texture attributes

“Which **taste and texture attributes** make the food and beverage experience **impressive** to you?”

40%

Rich flavor/taste

31%

Flavor combinations

Limited edition offering limitless taste experiences

“Which of the flavor aspects most influence your food and beverage choice?”

1 in 4

consumers globally say that **seasonal/limited edition flavors** is the flavor aspect that most influences their food and beverage choices.

+14%

Average annual growth in new F&B with **limited edition** claims

(Global, CAGR 2021-2024)

Limited Edition Oasis Treasures Chocolate

Canada, Nov 2024

Milk **chocolate** and white chocolate filled with **blue raspberry cotton candy** and **crunchy knafeh**.

Milk **chocolate** and white chocolate filled with **spicy lime tortilla chips** and **crunchy knafeh**.

Climate Adaption

Brands and consumers must find balance between personal values and product choices to get ahead of an everchanging climate.

“To what extent are you aware of the impact of climate change?”

Tangible impact in food and beverage

48%

Almost half of consumers globally are very or extremely **aware** of the impact of **climate change**.

Chocolate Coatings and fillings

Chocolate factories face challenges in cocoa sector.
October 15, 2024

Coffee

Volatile supplies, extreme weather and soaring prices weigh heavy on the sector.
August 06, 2024

Orange juice crisis:

Flavor Houses explores citrus product reformulation with alternative fruits. June 11, 2024

Olive oil

Prices climb as production falls to lowest levels in a decade. May 07, 2024

Price sensitivity & climate change: Consequences for consumers

Price is the top food and beverage aspect most **affected by climate change** according to consumers globally.

If the price of the product increases, consumers would...

Stop or reduce buying it

CHOCOLATE

Still buy it

COFFEE

Source: Innova Trends Survey 2025 (Average of Brazil, Canada, China, France, Germany, India, Indonesia, Mexico, Spain, UK, US), [ChoViva](#),

Qs: "To what extent do you think the following aspects of food and beverage products are affected by climate change?" "What will you do if the price of the following products increases due to the impact of climate change on product sourcing or production?"

Taste the Glow

Enrichment and dedication of products raise them to another level

With the cosmetic industry booming, now is the time to bring beauty-enhancing features into food.

+17%

Year-over-year
growth in new F&B
and supplement
launches with a
beauty claim

(Global, CAGR
2023-2024)

“Support hair, nails, and immunity,
while protecting your cells against
oxidative stress.”

UK April 2024

1 in 5

consumers globally have purchased food and beverage to
improve their physical appearance
or **beauty aspects** in the past year.

Top opportunity areas

#1 Facial skin

#2 Hair

#3 Body skin

Added benefits, something consumers are looking for.

Cocoa is one of the main ingredients of chocolate, and its **superpower** is that it contains magnesium

Source of magnesium. Vegan. No added sugar. Magnesium contained in it helps to reduce the feeling of tiredness.

Poland, May 2024

Rich in fiber. Enriched with vitamins: 5 vitamins (vitamin E, vitamin B1, niacin, vitamin B6 and folic acid).

Belgium Jun 2024

Mood Food Mindful Choices

As consumers prioritize their mental and emotional wellbeing, brands are crafting innovations that connect with their feelings.

High attention of consumers
toward mental health

Goal: Fulfilling the
opportunity gap

“Organic dark chocolate helps raise serotonin levels and produces endorphins that **reduce stress** and **generate feelings of pleasure.**”

United States, Oct 2024

Low association between
mental health and functional
food and beverage

Mental aspects for which consumers purchase
functional food:

#1 None of the aspects is a purchase driver

#2 Stress and anxiety

#3 Tiredness and fatigue

Exploring indulgent innovations to uplift mood

“Heavenly, delicate cinnamon notes and an unbelievable creamy caramel sauce, packed into **an ice cream so delicious that you’ll melt away...**

This treasure **will take you to your absolute feel-good place.**”

Germany Oct 2024

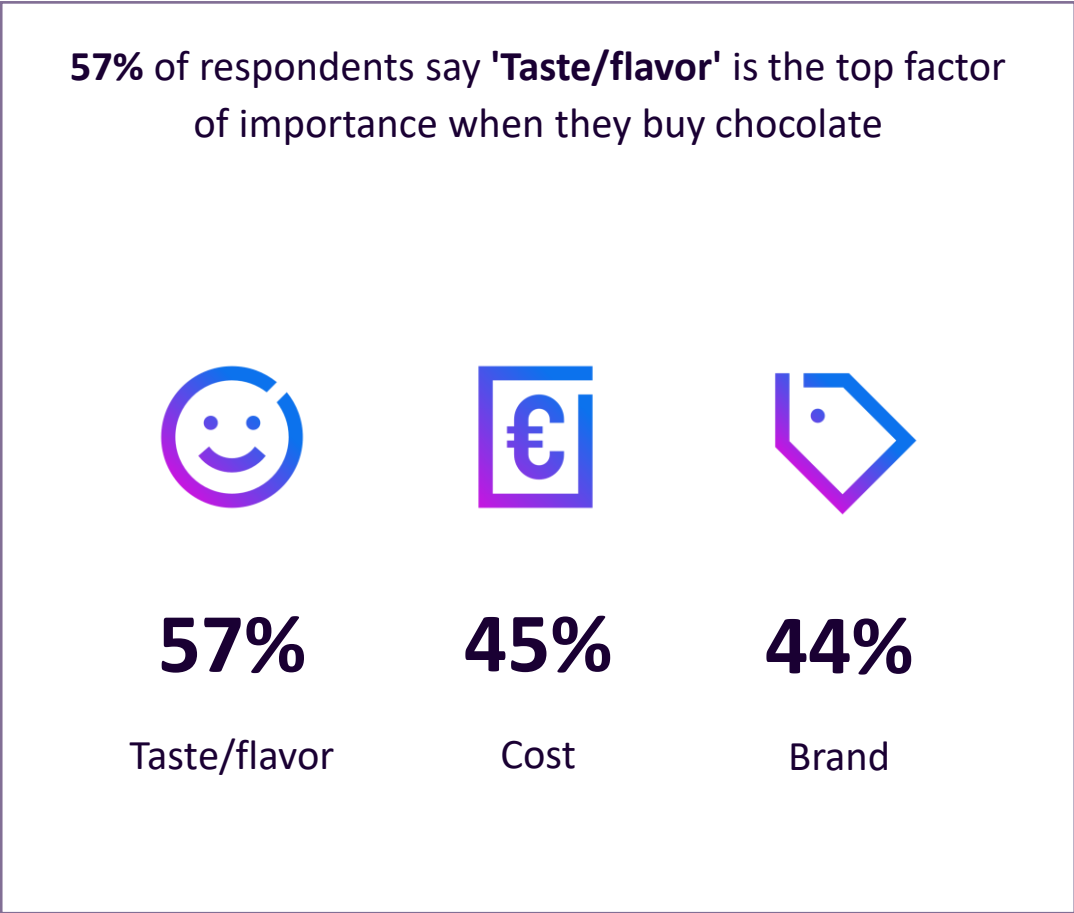

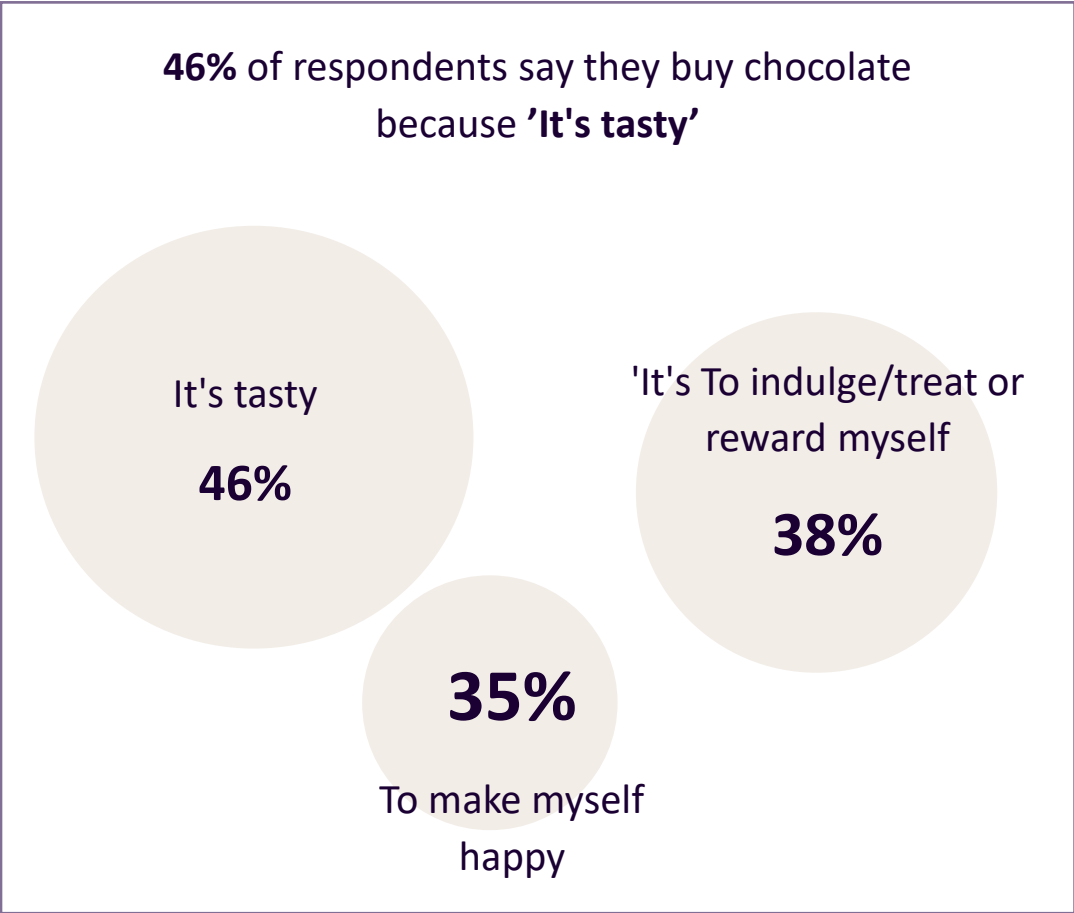

Consumers indulge to feel better

49%

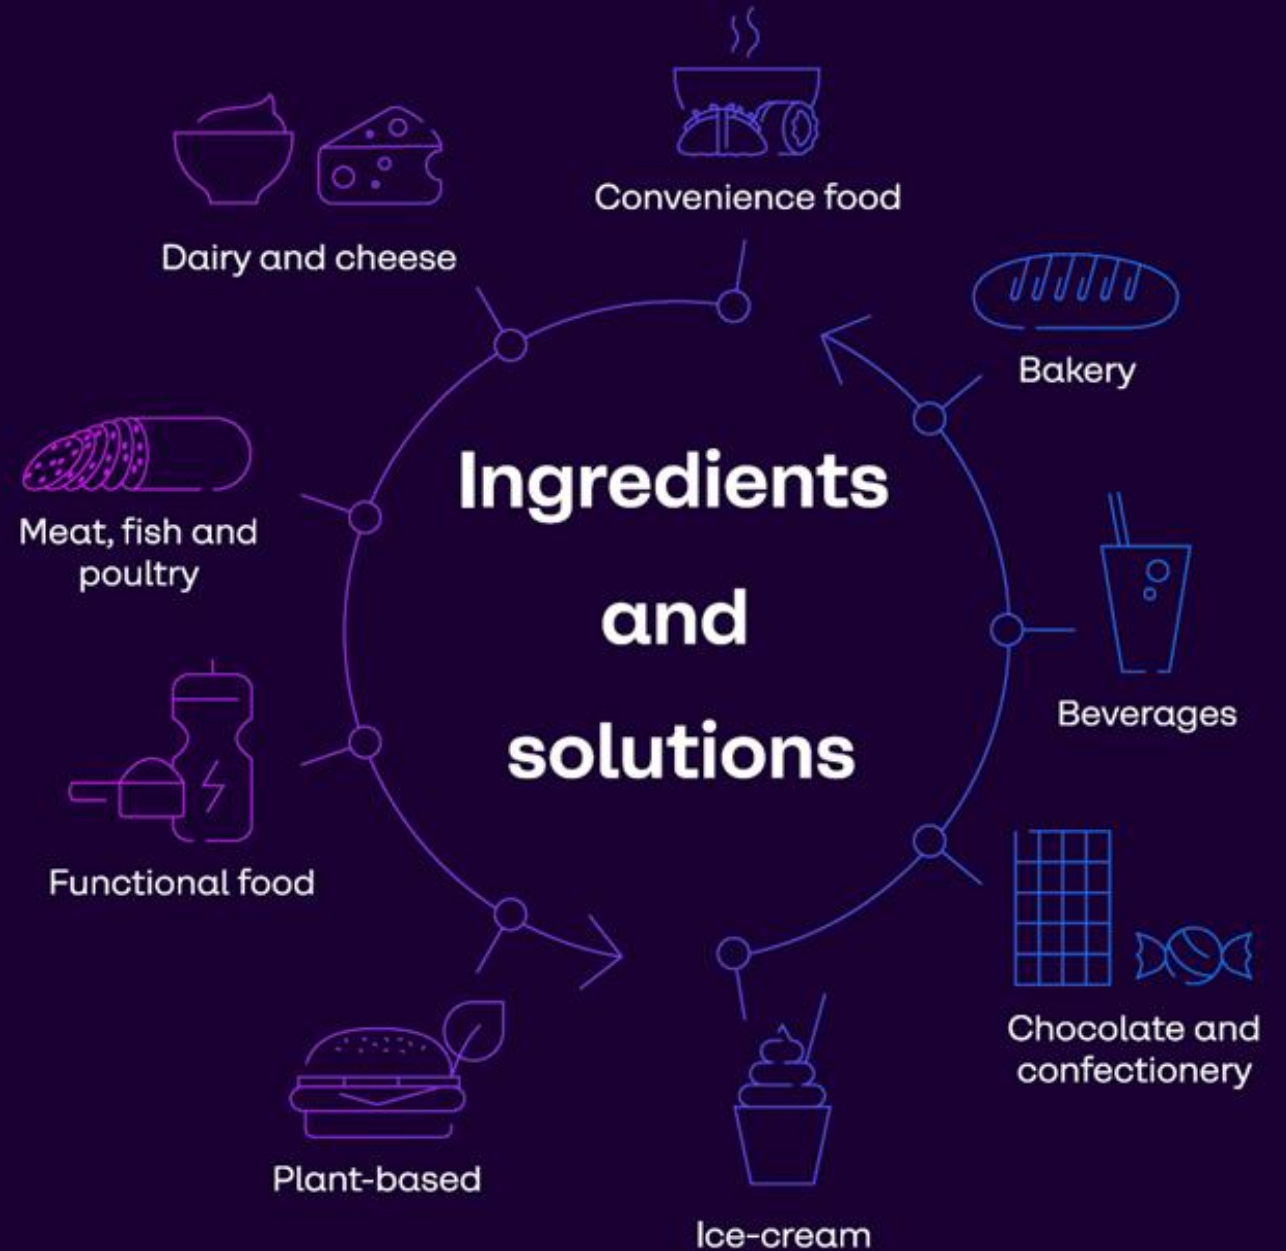

of consumers globally try **indulgent/premium food and beverages to alleviate their mood.**
